

Winflash BIOS SOP

Note: When flashing bios, please avoid system usage hence to make sure no other program is running. Some programs may interfere and cause system to be unstable.

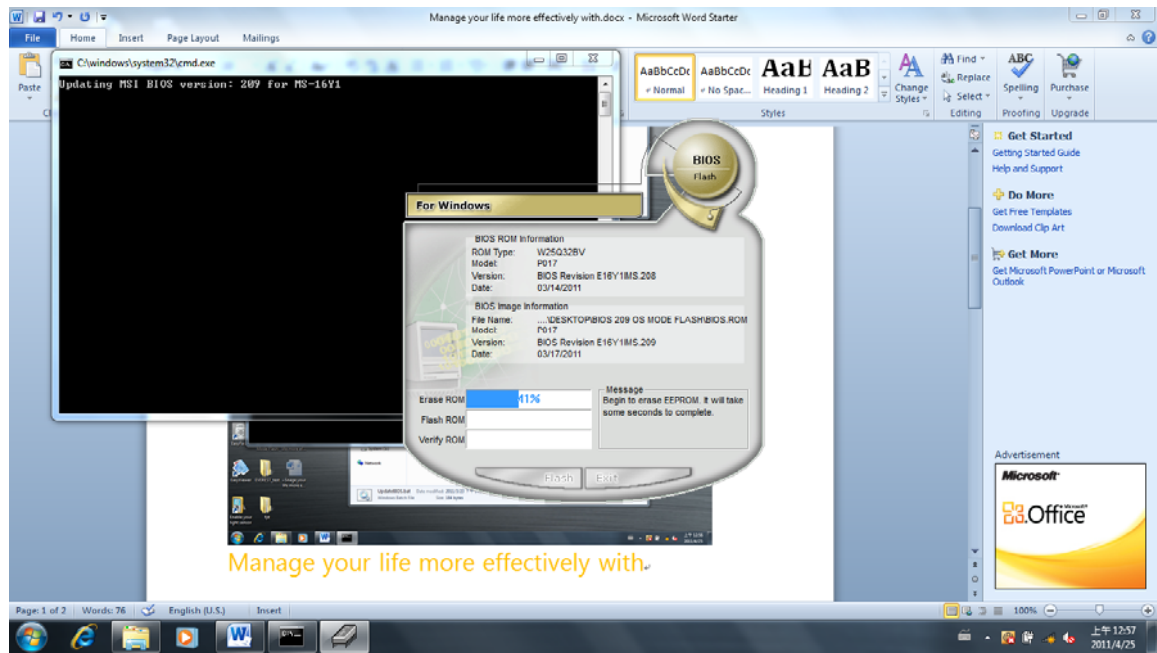

- 1) Download the BIOS from MSI web site.
- 2) Un-zip the file and verify if there are 2 files located inside namely, "flash.bat" and "BIOS.ROM".

- 3) Once verified, kindly double click the "flash.bat" to start bios update.

4) Bios flash utility will pop-up thus provide the status.

5) After successful bios update, please perform system restart.
